

HUB FOR THE REGION

SIEGERLAND
FLUGHAFEN

CLEARED FOR TAKE-OFF

Siegerland Airport, located in the three-border region of North Rhine-Westphalia, Rhineland-Palatinate and Hesse, has been serving as a flexible, efficient gateway to many European destinations since 1967. Thanks to prudent investments and a continuous improvement of our capacities, we prove to be

an attractive partner in both passenger and cargo traffic for numerous aviation and commercial enterprises. Our runway (1,620 m in length) is equipped with an instrument landing system (ILS) and also with GPS approach and departure procedures for RWY 13 and 31, enabling safe approaches and departures even for larger aircraft or in the event of adverse weather conditions.

Our commercial airport, the second highest in Germany, stands for short distances, good transport connections, customer-friendly service, flexibility, free parking, quick check-in times and much more. Our airport is home to various airlines, maintenance facilities and flight schools. Moreover, fully developed properties are available, some of which have a direct runway connection.

As a traffic platform, Siegerland Airport offers numerous services. These include:

INDIVIDUAL „POINT-TO-POINT“ TRANSPORTATION

- Passenger flights
- Training and instructional flights
- Air freight services
- Air sports
- Other general aviation

TOP-CLASS BUSINESS SERVICES

When you think of business flights within Germany or Europe, top-class business services and unlimited mobility, you probably think of larger hubs such as Düsseldorf or Frankfurt first. However, business and private travellers can reach many European destinations easily, quickly and comfortably from Siegerland Airport. Direct connections instead of complicated indirect flights thanks to perfect timing.

From Siegerland to over 1,000 airports throughout Europe

Air Alliance Express is an efficient charter company at your disposal and has its base at Siegerland Airport. In addition to charter flights, business flights can also be easily booked via air charter brokers. Due to the flexible organization of take-off and landing times and extremely short check-in and check-out times – from 5 to 15 minutes –, you can truly experience top-class business services on your business flight from Siegerland Airport to any destination in Europe.

& COMFORTABLE AND BARRIER-FREE

Travelers enjoy the highest comfort standards in all parts of Siegerland Airport. If you don't want to take the bus, rental car or taxi to get here, you can park your own car on one of the 240 free parking spaces. In addition, several charging stations are available at the car park. You can use waiting times for meetings or concentrated work in the VIP room which is equipped with free Wi-Fi. You can also bridge the waiting time in the cosy atmosphere of our airport restaurant overlooking the apron or on the panoramic terrace when the weather is nice. If you would like to rent a car on site, you can easily do so via the app2drive app which shows you all available cars.

In order to make traveling as comfortable as possible for guests with reduced mobility, we offer many barrier-free services. These include, among others: disabled parking, ground level entrance and waiting area, check-in desk and terminal, personal assistance in baggage handling, sanitary facilities equipped for disabled persons, provision of walkers, wheelchairs or lifting chairs for transportation purposes.

FLEXIBLE CARGO TRANSPORT THANKS TO OUR AIR CARGO CONTROL CENTRE

Machine downtimes are extremely expensive. It can be of vital importance for a company that high-quality spare parts are delivered to their destinations all over the world just in time and safely. Siegerland Airport is optimally equipped for this requirement.

Via charter flight, both the smallest packages and larger goods reach their destinations in Europe or overseas in a fast and extremely flexible manner. As a regulated agent (certified by the German Federal Aviation Authority (LBA)), Siegerland Airport operates its own air cargo control centre and can also meet the high security requirements for international air cargo services. We check, seal, declare and dispatch your deliveries directly and without unnecessary delay.

For the companies in our region that operate throughout Europe and globally, Siegerland Airport thus offers a very valuable component in their own transport logistics chain. In addition to our services regarding the quick dispatchment of goods, we also have appropriate storage areas to temporarily store export goods.

SAFETY FIRST

Our company fire brigade is responsible for the safety of flight operations at Siegerland Airport. Complying with the guidelines, it ensures that a fire can be extinguished at any location on the paved runway system within two, maximum three, minutes after an alert.

For this reason, basic training in firefighting and first aid training, continuous training in aircraft fire protection and other training courses are standard requirements for our firefighting personnel.

TAS 
TRAININGSZENTRUM
 Airport Siegerland

Our practical aircraft firefighting courses and trainings have an excellent reputation nationwide. In these courses, we impart the necessary knowledge and safety so that you are well prepared in case of an emergency. A variety of topics is covered, ranging from the basic course in aircraft firefighting and the advanced course in aircraft firefighting to crew training in cabin firefighting and an introduction to aircraft firefighting for public fire brigades. In all those areas, our fire simulation facility offers excellent conditions for practice-oriented training. Cockpit fires, seat fires, toilet fires, kitchen fires, engine fires, landing gear fires, surface fires and many more can be simulated.

Our training options are therefore very suitable for airfield operators, airport fire brigades and volunteer fire brigades, crews and fire protection assistants in companies.

DID YOU KNOW THAT SIEGERLAND AIRPORT IS A SO-CALLED AFIS AIRPORT?

But what is AFIS?

Smaller airports do not always need air traffic controllers on site to secure air traffic. Instead, so-called AFIS services can also be provided there. Aerodrome Flight Information Service (AFIS) provides pilots with important information for the safety of their flight, such as flight and weather information, navigation advice or current restrictions at the aerodrome. AFIS officers are also on duty at Siegerland Airport and provide pilots in the surrounding airspace with this important information. DFS Aviation Services GmbH, for example, is a certified provider of these services for aerodromes in Germany.

FROM A BIRD'S EYE VIEW

If you would like to enjoy the beautiful Siegerland landscape, you can do so by booking a sightseeing flight by helicopter or plane.

EXPERIENCING THE AIRPORT

Those who do not take to the skies but are enthusiastic about flying can experience the fascinating world of an airport on the ground. On a registered airport tour, visitor groups can take a look behind the scenes of an airport and gain insights into the world of flying. We will show you our terminal, tower, filling station and the airport fire brigade firsthand – and, at the same time, you might even be able to experience take-offs and landings up close.

A MAGNET FOR REGIONAL LOCATION MARKETING

The flexible platform “Siegerland Airport” and its attractive location in the three-border region offer people and goods a lot more than just short transport routes to other European destinations. As a provider of attractive commercial space, Siegerland Airport is also a magnet for regional location marketing. Our region provides aviation-related and other companies with very good transport connections via the A45/B54, a well-developed infrastructure as well as numerous attractive and fully developed commercial sites – either directly on the interregional Siegerland Airport commercial area with taxiway access or in one of the many commercial areas in our immediate surroundings.

Companies that want to rent existing premises are also in good hands with us. Siegerland Airport provides different offices as well as commercial rental space. Temporary rental of event locations is also possible – for conferences, meetings or events that require a special flair.

ATTRACTIVE TOURIST REGION

Furthermore, our forest-rich region also has many tourist highlights. These include the Rothaarsteig and Westerwaldsteig trail, which is 156 kilometres long and runs past our premises, as well as many other regional hiking trails, the Lahn Valley and sports activities such as sailing, windsurfing, boating and golf. You can find further information and interesting suggestions on the numerous offers in our region at www.siegerland-wittgenstein-tourismus.de.
